Material as a Conscious Design Choice

The foundation of Felthe solutions is PET felt – a material that represents a conscious approach to sustainable design. Made from over 60% recycled plastic, it gives PET bottles a second life. The material is lightweight, stable, durable, and perfectly suited for intensive public use.

For designers, the material is more than just an acoustic surface. Its structure, thickness, and color palette influence how space is perceived, how light is diffused, and how details are experienced. With a palette of 48 colors and multiple thickness options, PET felt becomes a flexible architectural medium that supports creative concepts rather than limiting them.

V-Cut Acoustic Walls - DRIFT.

V-Cut Acoustic Walls

Decorative PET felt panels with precision V-cut technology combine modern aesthetics with acoustic functionality. The geometric cuts create dynamic three-dimensional patterns that interact with light and shadow, adding depth and elegance to interior spaces. The precision cutting process ensures repeatable patterns and seamless compositions across larger wall surfaces. These panels improve acoustics while creating a refined visual identity for the interior.

acoustic panels

Spatial Acoustic Walls - BLADE.

Spatial Acoustic Walls

Walls are the largest surfaces in any interior – and the perfect place for acoustic treatment. Felthe wall panels are designed for vertical installation and actively reduce reverberation while enhancing the visual atmosphere of a room. Made from sound-absorbing PET felt, the panels improve acoustic comfort in offices, receptions, conference rooms, lounges, and residential interiors.

Spatial Acoustic Walls - BLADE.

acoustic panels

Acoustic Ceiling - BAFFLE LINE.

Acoustic Baffles

Baffle is a three-dimensional wall panel made of PET felt that transforms an ordinary wall into a sculptural architectural form. The rhythmic arrangement of vertical elements creates an undulating surface that reacts to light and gives the interior depth and an elegant, modern character.

This solution was designed for spaces where design must go hand in hand with functionality. The panel's structure not only creates a visual impact but also improves room acoustics, reducing reverberation and increasing the comfort of work or conversation.

The panel is lightweight, durable, and environmentally friendly. A wide range of colors allows it to complement both minimalist and more expressive arrangements.

Acoustic Walls - BAFFLE.

Felthe®
acoustic panels

Acoustic Ceiling - GRID.

Acoustic Ceilings

Felthe acoustic ceilings are designed for offices and public interiors where acoustic comfort matters. Installed directly on the ceiling or suspended with cables, the panels absorb sound while adding a lightweight architectural character to the space. The sound-absorbing properties of PET felt reduce reverberation and noise, creating a calmer and more comfortable environment.

Acoustic Ceiling - DART.

Felthe®
acoustic panels

Acoustic Island - PEBBLE.

Acoustic Islands

Suspended acoustic clouds combine effective sound absorption with lightweight sculptural forms. Mounted beneath the ceiling, they work precisely where reverberation accumulates most. Available in multiple shapes, formats, and colors, acoustic islands allow architects to create customized ceiling compositions for offices, conference rooms, restaurants, schools, libraries, and commercial spaces.

Acoustic Island - RING BAFFLE

Acoustic Coffe - PURE COFFER.

Acoustic Coffers

PET felt acoustic ceiling coffers improve room acoustics while creating a clean and modern ceiling finish. Lightweight and easy to install, they can be integrated into suspended ceiling systems or mounted as standalone elements. The modular structure also allows easy access to installations located above the ceiling.

Acoustic Coffer - OPEN BOX.

Freestanding Acoustic Partitions

Freestanding Acoustic Partitions

Freestanding acoustic partitions provide flexible space zoning without permanent installation. Designed for modern offices and open interiors, they reduce reverberation and noise while visually organizing work, meeting, and relaxation zones. The lightweight construction allows quick repositioning and flexible arrangement changes.

Freestanding Acoustic Partitions - WALLT.

Printed Acoustic Panels - FELTHE x MURALESCA.

Printed Acoustic Panels

Printed acoustic panels combine sound absorption with unlimited visual possibilities through durable UV printing technology. The PET felt surface allows accurate reproduction of graphics, textures, patterns, branding, and illustrations. These panels are ideal for offices, hotels, schools, reception areas, and commercial interiors where aesthetics and functionality need to coexist.

Acoustic Furniture Fronts - ZENITH.

Acoustic Furniture Fronts

Acoustic furniture fronts combine artistic expression with sound absorption. Inspired by sculpture, graphics, and light movement, they create visually engaging compositions while improving acoustic comfort. Their three-dimensional structure enhances sound absorption while introducing rhythm, depth, and a modern visual identity into interiors.

Acoustic Furniture Fronts - DICE.

Acoustic Lightning MADE IN ITALY

Acoustic Lighting

Felthe acoustic lighting combines high-quality illumination with sound absorption. PET felt fixtures absorb sound waves, reduce reverberation, and improve acoustic comfort while delivering soft and balanced lighting. Available in various forms and colors, the fixtures can function as ceiling panels, suspended lamps, or decorative lighting accents.

Acoustic Lightning - RIBB.

Acoustic Artwork

Acoustic artwork panels combine functionality with contemporary interior design. Made from high-quality PET felt, they absorb sound, reduce echo, and improve acoustic comfort while acting as decorative wall elements. The three-dimensional structure creates visual depth and adds character to interiors such as offices, restaurants, conference rooms, lounges, and residential spaces.

Acoustic Artwork - OAK.

Color chart

Get to know the material before it becomes part of your project.

The Felthe sample catalog is a convenient way to see, touch, and compare the texture of the material in real life. The sample catalog was designed to facilitate the work of architects and interior designers. Its compact format allows for quick viewing of colors, matching them to finishing materials, and testing combinations during project development. Each sample represents the actual color, texture, and quality of the material used in Felthe acoustic panels. You can receive the catalog free of charge by completing the form. This will make it easier to plan your project and choose the perfect color for your interior.

Print chart

See how a design will look in your interior – even before the final design is created. The Felthe print design catalog includes carefully prepared graphic samples that can be applied to various surfaces: walls, furniture, and finishing elements. This makes it easy to see how a given design will complement the interior's colors, materials, and lighting. This is a practical tool for architects and designers, allowing them to make more informed design decisions even at the concept stage. The samples demonstrate the actual print quality and character of the designs available in the Felthe collection.
